

Tuesday, week 3 of term 4

Morning, Sam

Five lessons today and four things due this week.

● Live now

Digital Technologies with Ms Patel

The class is on page 200, Problem B. Started 4 minutes ago in room D2.

Join lesson

Today		Full week
9:00 Period 1	Mathematics Mr Harris, M2 Linear equations, exercise 4.3 See what we covered	Done
10:05 Period 2	Digital Technologies Ms Patel, D2 Loops: page 200, Problems A to D	● Live now
11:05	Interval	
11:25 Period 3	English Ms Wong, E7 Persuasive writing: paragraph structure	
12:30 Period 4	Science Mr Brooks, S3 Acids and bases: practical Bring your lab book	
1:30	Lunch	
2:15 Period 5	Physical Education Mr Reid, Gym Fitness testing Bring PE gear	

Due	This week
Loops, Problems C and D Digital Technologies Tomorrow, 3:00pm	Started
Exercise 4.3, questions 1 to 12 Mathematics Thursday, 9:00am	Not started
Persuasive paragraph, first draft English Friday, 3:00pm	Not started
Acids practical write-up Science Friday, 3:15pm	Not started
See all 6	

From your teachers

Science, Mr Brooks

Bring your lab book today. You can't join the practical without it.

Mathematics, Mr Harris

The algebra test has moved to next Wednesday, Period 1.

My classes

Class	Last lesson	Next lesson	Due
Digital Technologies Live Ms Patel	Loops, page 200 (today)	Thursday, Period 3: loops practice	1 item
Mathematics Mr Harris	Linear equations, exercise 4.3 (today)	Wednesday, Period 1: graphing lines	1 item
English Ms Wong	Persuasive devices (Monday)	Today, Period 3: paragraph structure	1 item

Today's lesson

✓ Recap: while loops

✓ Page 200: for loops

✓ Problem A

4 Problem B
The class is here

5 Problem C

6 Wrap-up

Page 200

Year 11 Digital Technologies workbook

Problem B

Write a program that asks for five test scores, one at a time, then prints the average.
Use a for loop instead of five separate input lines.

problem_b.py

▶ Run

```
1 total = 0
2 for i in range(5):
3     score = input("Score: ")
4     total = total + score
5
6 print("Average:", total / 5)
```

Output

Score: 80

Line 4: TypeError: unsupported operand type(s) for +: 'int' and 'str'

💡 Helper Hints only

Ms Patel's rules for this lesson: hints only, no full answers, stay on loops.

why does it say unsupported operand

Good move reading the error. Python can't add two different types together on line 4. What type of value do you think input() gives back?

a number?

Test it. Add print(type(score)) under line 3, run it, and see what it says.

You're 2nd in line for Ms Patel. Keep going with a hint while you wait.

Ask the helper

Ask for a hint

Ms Patel can see this chat.

Finish from class

Loops, Problems C and D

Set by Ms Patel on Tuesday. Due tomorrow, 3:00pm.

You solved A on your own and B with two hints. Your code for Problem C is saved where you left it.

Helper at home: hints only, up to 3 per problem

Continue Problem C

Next lesson

Thursday, Period 3

Room D2

Loops practice, pages 201 to 203

From Ms Patel

Skim page 201 before class so we can start straight away.

Lesson log

Tuesday, Period 2

Loops: page 200

What the class went through

- 1 Recap: while loops
- 2 Page 200: for loops
- 3 Problem A
- 4 Problem B
- 5 Problem C, set as homework

From Ms Patel's board

```
for i in range(3):
    print("Round", i)

# prints Round 0, Round 1, Round 2
```

Your work

Problem A

On your own

Problem B

With 2 hints

Problem C

Started

You raised your hand once. Ms Patel helped you with line 4.

[Open your code](#) [Read your helper chat](#)

Takeaway

range(5) runs five times but counts from 0, so i goes 0, 1, 2, 3, 4.

Check yourself

One question on Tuesday's lesson. No helper, about 3 minutes.

Start check

Last check, while loops: correct on your own.

Marks and submissions

These stay in your school's learning platform.

[Open \[school platform\]](#)

Last Thursday, Period 3

While loops: pages 194 to 199

5 steps. You solved 3 of 4 problems on your own.

Open lesson

Last Tuesday, Period 2

Input and variables: pages 188 to 193

You were away Everything the class saw is here.
